## FEATURES

### NeoFrost™ Technology

Certain Beko fridge freezers are equipped with advanced NeoFrost™ Technology, which provides more homogenous, energy efficient and silent cooling. There is no air transfer between the freezer and fresh food compartments. This eliminates odor mixing.

### Hygiene+

Present in some fridges is the photo catalyst filter, which eliminates bacteria potentially present in the refrigerator by working in conjunction with the air-cooling systems of the no frost or static models. This ensures permanently high levels of hygiene, protection from bacteria buildup and reduced fridge odor. The carbon filter can be reactivated easily with just one day's exposure to sunlight.

### White LED Lightning

The majority of models in the Beko range feature illumination with white LED for better aesthetics inside your fridge and less energy consumption.

### HygAIR Technology

The exceptional HygAIR Technology, available in select Beko refrigerators, brings the freshness of the pine forests to your kitchen. The technology eliminates airborne bacteria and odor-forming molecules by producing natural negative ions inside the cabinet. The ions capture microorganisms and remove them from the refrigerator via the defrost process. As a result, your food stays fresher for longer, and you can smell nature in your fridge.
