Heat pump

Ventless Heat Pump Dryer

If you're concerned about the logistics or expense of venting a new dryer, Beko's Ventless Heat Pump Dryer is an innovative solution. Our award-winning [2017 ENERGY STAR Most Efficient](#) Heat Pump Dryer uses an ingenious closed loop heat exchange system to reuse hot air and eliminate humidity build-up during drying cycles. And because it dries at a significantly lower temperature, this compact dryer pampers your clothing while saving you money on energy bills.

ProSmart Inverter Motor Technology

There's no reason to sacrifice the serenity of your home for the performance of a Beko dryer. Our technologically advanced ProSmart™ Inverter Motor provides both noise reduction and superior cleaning ability. Plus, it's durable and energy efficient, so you can have some peace with your quiet.

Anti-wrinkle

Gentle drum action separates clothing throughout the drying cycle to ensure ready-to-wear, wrinkle-free results. In case the laundry is not removed after the program is completed, the wrinkle prevention program that lasts 2 hours start to prevent wrinkling of the laundry that remains inside the dryer.

Jeans

Use Beko's Jeans Cycle to thoroughly and uniformly dry even your toughest drying challenges.

Quick Dry 30'

Beko's Quick Dry cycle dries shirts more delicately and causes less wrinkles. Your shirts will be just ready for easy ironing.
